PROFILE

I'm a Full Stack TypeScript/JavaScript developer with 15+ years building scalable, user-focused web applications. I specialise in React and Next.js front-ends and Node/NestJS backends, with strong experience in AWS, Prisma and performance-driven UX. I collaborate closely with product teams to design maintainable architectures, ship features quickly, and improve reliability and developer velocity.

EMPLOYMENT HISTORY

Full Stack Javascript Engineer at Playroll, Cape Town

Oct 2022

Full Stack JS/TS Engineer working on Next.js and MUI front-ends, microservice architectures, and AWS. Delivered performance optimizations and tooling to improve developer velocity and CI/CD. Assisted with internal AI tooling initiatives—specifically Retrieval-Augmented Generation (RAG) pipelines—to integrate knowledge retrieval into product features.
